ABSTRACT

This report measures the draw of public, private, and special high school graduates to Miami-Dade Community College (MDCC) in Florida. For the public schools, 5 years of enrollment data are presented, spanning 1993-94 through 1997-98. Draw data for Dade County private and public special high schools are for 1997-98. The statistics for the individual MDCC campuses emphasize campus enrollments from any recruitment area, and summaries are provided for four Dade County Community College campuses: North, Kendall, Wolfson, and Homestead. The report focuses on how changes in the percent draw of high school graduates determine whether the college/campus is losing or gaining ground in enrollments relative to graduates, and how changes in the absolute draw give the magnitude of enrollment changes. Results indicate that there were 12,488 graduates from the county's public school system in 1996-97 (representing a sharp decrease in the number of graduates with standard diplomas), 4,975 of whom enrolled at MDCC. Across the five years, there were large decreases in draw within each ethnic group, with decreases in White non-Hispanic enrollments measuring 29%, Black non-Hispanic enrollments 19%, and Hispanic enrollment dropping 12.5%. Tables 1-6 indicate draw according to: (1) ethnic distribution; (2) prior year graduates of all individual Dade County public high schools; (3) the college's total percent; (4) public schools, sorted by the college's total number enrolled; (5) private and special public high schools; and (6) private and special schools, sorted in descending order by the college's total enrollment. Appended are 22 data tables and 9 figures. (AS)

Direct Entry Enrollments of
Dade County Public, Special, and Private High School Graduates
Annual Report Years 1993-94 Through 1997-98

This volume of the high school report monitors the draw of public, private, and special high school graduates to Miami-Dade Community College (M-DCC). Graduates from alternative public schools and those with non-standard diploma are excluded from the study. For the public schools, five years (1993-94 through 1997-98) of enrollment data are presented. The statistics for the individual M-DCC campuses emphasize campus enrollments from any recruitment area. The focus of this report is twofold: 1) changes in the percent draw of high school graduates determine whether the college/campus is losing or gaining ground in enrollments relative to graduates, and 2) changes in the absolute draw give the magnitude of the enrollment changes. Draw data for Dade County private and public special high schools is for 1997-98.

COLLEGE-WIDE SUMMARY

Table 1 shows the draw by ethnic distribution of Dade County public high school graduates (DCPS) who earned standard diplomas in each of the years prior to the draw year. The number of high school graduates decreased 9.0% over the five year period 1993-94 to 1997-98. The College absolute draw of these high school graduates in that time frame decreased a steeper 15.9%. Consequently, the College has been losing ground in the enrollment of all direct entry high school graduates from the DCPS, during the five-year period.

- There were 12,488 graduates from the County's public school system in 1996-97. This represented a sharp decrease in the number of graduates with standard diplomas, and a similarly marked increase in the number of graduates with non-standard diplomas (from 511 in 1995-96 to 1,004 in 1996-97). Of the standard diploma graduates, 39.8% or 4,975 enrolled at M-DCC.

- From among 1997-98 White non-Hispanic prior year graduates, 25% were drawn to the College. Of the Black non-Hispanic graduates, nearly 29% were drawn, and slightly over 51% of Hispanic students were drawn to M-DCC.

- Across the five years, there were large decreases in draw within each ethnic group. White non-Hispanic enrollments decreased a particularly steep 29%, Black non-Hispanic enrollments fell a sharp 19%, and Hispanics dropped 12.5%.

- For the short-term period (report years 1996-97 to 1997-98) the College gained ground in the draw of Hispanic graduates from all recruiting schools, but lost ground in the draw of White and Black non-Hispanic graduates. For the long-term period (1993-94 to 1997-98), the College lost ground in the draw of all ethnic groups.

Figure 1 depicts the College-wide-wide draw of high school graduates for the past five years -- 1993-94 through 1997-98. The lighter gray represents the number of graduates who did not attend M-DCC. The darker gray represents the draw to the College. The draw steadily declined from 5,913 to 4,975 graduates in the latest year, nearly a 16% enrollment decrease.

Table 2 shows the draw from the prior year graduates of all 25 individual Dade County public high schools. These schools are highlighted and arranged in alphabetical order. All tables displaying individual high schools give enrollments at M-DCC campuses regardless of the campus recruiting area.

BEST COPY AVAILABLE

- Of the total number DCPS graduates (12,488), Kendall Campus enrolled the largest proportion, 18.1%, followed by North Campus, 11.6%; Wolfson Campus, 8.3%; and Homestead Campus, 1.9%.

- In absolute terms, Braddock provided the most (433) graduates and Northwestern the fewest (77 graduates).

The data for Table 3 are sorted by the College's Total Percent draw (highlighted column). These percents are in descending order.

- The schools from which the percent draw are highest include South Miami (58%), Southwest (54%), Braddock (52%), and Hialeah (50%). Just below these, four schools are within a few percentage points of each other (Miami Senior, Sunset, Miami Springs, and Coral Park).

- Schools with the lowest percent draw, all within the 20% to 30% range, are North Miami Beach (the lowest at 20%), Northwestern, Palmetto, Carol City, Central, and Norland.

Table 4 gives the public school draw sorted by the College's Total Number Enrolled (highlighted column). Sorts on all tables are in descending order.

- The largest number of students was drawn from Braddock (433), followed by Sunset (359), and Hialeah (316). Though Killian was fourth in absolute numbers drawn (289), it was thirteenth or mid-group in rank of percent drawn (39%).

- There were eight schools with fewer than 125 students drawn. The lowest numbers were from Northwestern (77), Carol City (99), and Norland (100).

Table 5 displays data from Dade County private high schools as well as the county's special public high schools. Many of these private schools are parochial schools.

- Twenty-nine specific private high schools and 28 others, combined, yielded 850 graduates drawn to M-DCC.

- The largest number of these students enrolled at Kendall (458 or 54%). North drew 27% or 227 graduates. Seventeen percent (144 students) went to Wolfson and 2.5% (21 students) selected Homestead.

Table 6 displays the private and special school data sorted in descending order by the College's Total Enrolled (highlighted first column of numbers).

- The largest number of graduates is from St. Brendan (134). Its counterpart, Christopher Columbus, is third in absolute size drawn (69).

- Turner Technical, a special public school, had the second largest draw of graduates (98) from among this category of schools.

- Others of the higher draw schools are Monsignor Edward Pace (50), Immaculata La Salle (49), Our Lady of Lourdes (42), and South Florida International Academy (39).

NORTH CAMPUS SUMMARY

Table 7 provides data on M-DCC's draw of DCPS graduates from North Campus recruiting schools for the period 1993-94 through 1997-98.

- For the latest year, there were 4,365 graduates from the public high schools in the North Campus recruiting area. M-DCC drew 1,436 or 32.9% of these graduates.

- In the same year, M-DCC drew 16.7% of the White non-Hispanic graduates, 27.6% of the Black non-Hispanic graduates, and 44% of the Hispanic graduates.

- In comparing 1993-94 to 1997-98, the decline of high school graduates was 10.8% while the decline in draw was 17.6%. The drop in draw among White non-Hispanics was startling -- more than 45%. Black non-Hispanic enrollments fell 16.6% and the Hispanic draw dropped more than 15%.

- In both the short-term (1996-97 to 1997-98) and long-term periods (1993-94 to 1997-98) M-DCC lost ground in the enrollment of White non-Hispanic, Black non-Hispanic, and Hispanic graduates from North Campus recruiting schools.

Figure 2 is a graph of the draw from North Campus recruiting schools to M-DCC during the period 1993-94 through 1997-98. The bottom light gray area of the bar stands for graduates who did not attend M-DCC. The darker gray portion stands for M-DCC's draw from North's recruiting schools. The decline in draw was gradual but steeper in the latest year. During the five year period, there was a loss in draw of 307 or 17.6% of high school graduates from the North recruiting area. For the most part over the years, more than 3,000 graduates were potential enrollees.

Table 8 presents draw data for the 25 Dade County high schools sorted by the Percent Enrolled at North. The nine schools in the North recruiting area are distinguished by double asterisks after their names.

- Students enrolled at the North Campus are, of course, predominantly from the North Campus recruiting area. Overall, North Campus enrolled 1,452 graduates or 11.6% of all DCPS graduates, and 29.2% of all graduates drawn to the College.

- The top percent draw to North Campus, Hialeah (46%), is also the top absolute draw (291). A substantial percentage gap exists before the second highest appears -- Hialeah-Miami Lakes (34.4% or 178 students).

- Although not in the North recruiting area, the Miami Springs draw was more akin to the North recruiting area.

- Both Northwestern and North Miami Beach had fewer than 16% of their respective graduates enroll at North Campus.

Figure 3 shows North Campus enrollments from its own recruiting schools. The light gray bottom section of the column denotes high school graduates who are not attending M-DCC. The darker gray shows the draw to North Campus and the top of the column gives the number of students from this recruiting area attending other Miami-Dade Community College campuses. Draw potential can be seen in this chart.

Table 9 gives 1997-98 private and special high school draw data sorted by the Number Enrolled on North Campus. Listed are 29 private/special schools. The "Other Private" category consists of 28 undifferentiated schools. There were 227 students (26.7%) drawn to the North Campus. The highest number was drawn from Turner Technical. These 88 Turner graduates represent 90% of the Turner draw to M-DCC. In second place was the 43 student draw from Monsignor Edward Pace. These two schools make up 58% of the private/special draw to North.

KENDALL CAMPUS SUMMARY

Table 10 displays M-DCC's draw of graduates from the Kendall Campus recruiting schools during the five-year period, 1993-94 through 1997-98.

- There were 4,832 graduates for the latest year and 2,154 were drawn (44.6%).
- In the same year, 26% of the White non-Hispanic were drawn, 29% for Black non-Hispanic graduates, and 56% for Hispanics
- Across the five years, high school graduates declined nearly 3%, but the decline in draw was nearly 13%. White non-Hispanic draw tumbled 25%; Black non-Hispanics fell 13%, and the Hispanic draw dropped 10%.
- For the short-term period (1996-97 to 1997-98), M-DCC gained ground in the draw of Hispanic graduates from Kendall Campus recruiting schools, and lost ground in the draw of Black and White non-Hispanic graduates. For the long-term period (1993-94 to 1997-98), M-DCC lost ground in the draw of all ethnic group of graduates from Kendall Campus recruiting schools.

Figure 4 shows a bar chart of M-DCC's draw from the Kendall Campus recruiting schools for the past five years, 1993-94 through 1997-98. The light portion of the bar represents graduates whose status is unknown. The darker portion of the bar represents the draw to M-DCC. The drop in long-term draw was 13% (or 318 students) and this was the least decline among recruiting campuses.

Table 11 contains the campus draw from all recruiting schools sorted by the Percent Enrolled on Kendall for 1997-98, in descending order. The Kendall recruiting schools are designated with double asterisks. As an aggregate, Kendall's recruiting schools drew the most graduates to the College and to its own campus.

- There were 2,258 (18.1%) students drawn to the Kendall Campus. This number represents 45.4% of all students drawn to M-DCC.
- Southwest was highest with 50.1% or 231 graduates, closely followed by Braddock at 49.8% or 418 students. Sunset, while lower in percent drawn as a portion of the graduating class, enrolled 348 students at Kendall and this is the second highest in absolute draw for the College. From Coral Gables High School, nearly as many students were drawn as were drawn from Palmetto, although the former is not in the Kendall recruiting area.
- There were 287 students enrolled at the Kendall Campus from other Dade County public high school recruiting areas, the highest "bonus enrollments" among campuses.

Figure 5 depicts the Kendall Campus draw from its own eight recruiting schools for 1997-98. The light gray section of the columns represents the number of graduates who did not attend M-DCC. The dark gray denotes graduates from the Kendall recruiting area attending the Kendall Campus. The white upper section shows the enrollments from the Kendall recruiting schools to other M-DCC campuses.

Table 12 presents the 1997-98 draw from private and special Dade County public high schools. These schools are sorted in descending order by the Number Enrolled on Kendall Campus.

- Of the 850 total private/special students drawn to M-DCC, 458 or 54% were drawn to the Kendall Campus.

BEST COPY AVAILABLE

- The draw was highest from St. Brendan (128 enrollments), followed by Christopher Columbus (65). Immaculata La Salle and Our Lady of Lourdes provided 38 and 34 graduates, respectively.

- All but three private/special schools show enrollments on this campus.

WOLFSON CAMPUS SUMMARY

Table 13 presents M-DCC's draw from the Wolfson Campus recruiting schools by ethnicity, covering 1993-94 through 1997-98.

- Of the 2,681 high school graduates shown for report year 1997-98, 43.5% or 1,166 were drawn to M-DCC.

- In the same year, 70 or 26.4% of White non-Hispanic graduates, 232 or 32.5% Black non-Hispanic, and 855 or 51.3% Hispanics were drawn. The Hispanic draw is close to Kendall's 55.9% Hispanic draw.

- Across five years, the decline in high school graduates was 17.7% and the overall draw to M-DCC declined 21.6%. The drop in draw for White non-Hispanics was a dramatic 35% and for Black non-Hispanics, 30.1%. The Hispanic draw was down considerably, 178 students or 17.2%.

- For the short-term period (1996-97 to 1997-98), M-DCC gained ground in the draw of White and Black non-Hispanic graduates from Wolfson Campus recruiting schools. For the long-term period (1993-94 to 1997-98), M-DCC lost ground in the draw of all ethnic groups from Wolfson Campus recruiting schools.

Figure 6 graphs M-DCC's draw from the Wolfson recruiting area for 1993-94 through 1997-98. The light gray area depicts the unknown status of these high school graduates. The dark gray represents graduates enrolled at M-DCC. Over the long term, there was a sizable 21.6% loss in draw (321 graduates).

Table 14 shows the campus draw from all 25 recruiting schools in 1997-98. Data are sorted by the Percent Enrolled at Wolfson, the highlighted column. The Wolfson recruiting schools are denoted by double asterisks.

- There were 1,032 graduates enrolled at Wolfson. This absolute draw is equivalent to 20.7% of Miami-Dade's draw.

- The recruiting schools with the largest percent draw to Wolfson are Miami Senior (226 or 43%), Miami Beach (152, 35%), and Jackson (122, 34%).

- The recruiting schools with the lowest draw to Wolfson are Miami Springs (69, 16%), and Coral Gables (122, 20%).

Figure 7 shows the draw of Wolfson Campus from its own recruiting schools for 1997-98. The light gray represents the graduates whose status is unknown. The dark gray denotes the enrollments to Wolfson from this campus' recruiting schools. The top white rectangle shows the enrollments from the Wolfson recruiting schools to the College's other campuses. In two cases, the draw to other campuses is greater than the draw to Wolfson.

Table 15 depicts the draw from private and special public high schools in 1997-98. Schools are sorted by the Wolfson Campus Number Enrolled. The draw is characterized by a spread of single digit numbers across more than 2/3 of the schools with enrollments.

- There were 144 students or 17% of the total, drawn to the Wolfson Campus.

- The schools contributing the largest number of graduates were the Design and Architecture High School (21 enrollments) and the New World School of the Arts (17 enrollments).

**Includes 10 private schools (with identical high school codes) and 18 schools with fewer than six students drawn from each.

HOMESTEAD CAMPUS SUMMARY

Table 16 gives M-DCC's draw from the Homestead recruiting schools by ethnicity for 1993-94 through 1997-98. This is the only campus with enrollment gains in the high school draw, albeit modest (1.9%).

- There were 610 graduates reported under 1997-98 from the two recruiting high schools and 219 or 36% were drawn to the College.
- The small numbers in the two year comparison, when further segmented by ethnicity, present changes across comparison years that can be misleading.
- Across the five-year period, the White non-Hispanic draw dropped 13%; Black non-Hispanics decreased 6.5%, but Hispanics gained 13.3%.
- For the short-term period (1996-97 to 1997-98), M-DCC gained ground in the draw of Hispanic graduates from Homestead Campus recruiting schools, but lost ground in the draw of White and Black non-Hispanic graduates. For the long-term period (1993-94 to 1997-98), M-DCC lost ground in the draw of Black non-Hispanic and Hispanic graduates, but gained ground in the draw of White non-Hispanic graduates.

Figure 8 shows M-DCC draw from Homestead recruiting schools for 1993-94 through 1997-98. The light gray denotes number of graduates whose educational status is unknown and the dark gray, the number drawn to M-DCC. Both the numbers graduating and the numbers drawn fluctuate over a narrow range across time with an average draw of 223 students..

Table 17 presents Homestead's draw from all recruiting schools. Statistics are sorted by Percent Enrolled on the Homestead Campus. The Homestead recruiting schools are designated with double asterisks.

- There were 233 total graduates drawn (1.9%). This number represents 4.7% of the total enrolling at M-DCC.
- There were 96 graduates (29%) drawn from the Homestead High School. South Dade had 74 graduates or 26% drawn.
- Homestead Campus enrolled 63 graduates from 12 high schools outside of its recruiting area.

Figure 9 shows the Homestead Campus draw from its own recruiting schools. The light gray denotes the unknown status of graduates from each of the schools. The dark gray shows the number of these graduates enrolled at the Homestead Campus. The top white rectangle gives the number of students from the Homestead recruiting area who are attending another M-DCC campus.

Table 18 presents the draw of private and special public high school graduates at Homestead for 1997-98. The table is sorted by the Homestead Campus Number Enrolled (absolute draw highlighted column). Of the total 850 graduates drawn to the College, 21 or 2.5% of them were enrolled on the Homestead Campus.
